Description

The Thin Small Outline Package (TSOP) is a very low-profile package with tight tight lead spacing. TSOP is available in a thermally enhanced version (TSOP-ep), as well as a stacked die version (TSOP-SD). Die stacking is available from 2 to 4 die, with bonding pads on two sides of the die or single-sided bonding pads.

TSOP delivers optimum electrical and thermal performance. Our state of the art assembly facility and proven materials assure high yield manufacturing and long term reliability.

Electrical Performance

Electrical parasitic data is highly dependent on the package layout. 3D electrical simulation can be used on the specific package design to provide the best prediction of electrical behavior. Data below is for a frequency of 100MHz and assumes 1.0 mil gold bonding wire.

Conductor Component	Body Size (mm)	Lead/Wire (mm)	Resistance (m0hm)	Inductance (nH)	Mutal Inductance (nH)	Capacitance (pF)	Capacitance Mutual (pF)
